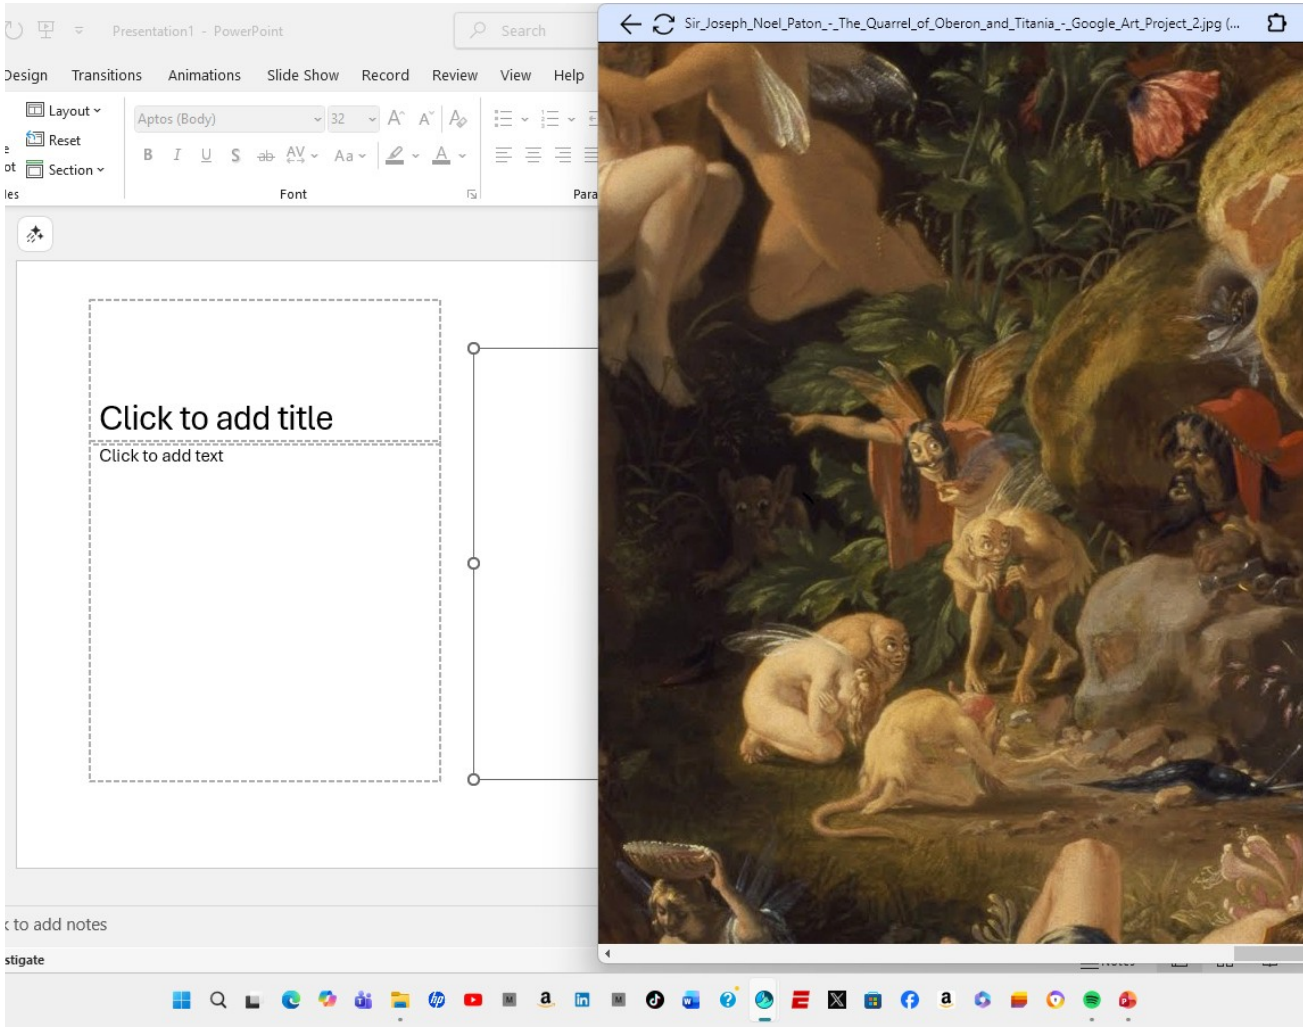
Close up of Sir Joesph Noel Patton’s artwork

Concepts:

1) Terror
2) Enslaving gesture
3) Immodesty, free love and brothel/whore house as a business
4) Universal moral take away v Global hegemony v regional dynastic China on its treatment of foreigners and minority groups NOT addressed in the Mandarin scholarship, discourse and legal history as well as their government and respective regimes
5) Identity and background racial, morphological and ethnic composition of those broadly categorized as foreigners, aliens, ethnic minorities, virtually non-Mandarins and other Chinese who are not Han Chinese stock
6) Exodus from China after trades (business class: merchants and traders, dignitaries) to dynastic Korea, a neighboring country. Hong: German race encompassing Czech, Poland, Moravia, broadly termed Prussia incorporated into Hong clan(s) mostly Namyang and Poongsan clans and Jang/Chang clans absorbed people from Mid East, Semetic Arabs and Iranians
7) Ottoman Empire people: conjecture because of ease of language into Korean which is Altaic Tungistic tongue they integrated more readily than johnny come lately Aryans from Europe and Arabs from Middle East.



Ottoman Empire (1919)

US military assistance paved shift of focus from Northeast Asia’s China to Afghanistan

Afghanistan

Location: much closer to India's only left Pakistan and the original landing of Aryans from Jupiter (their language may be closely related to Norwegian) at about Punjab in northwest India enabling public to become more cognizant of Chinese minority groups and corollary to this is the flip side talk meaning the Silk Road encompassing Tsien Tshen (note sp. Tienshan) territories.

Tienshan & its role under the Sun

City, town and non-contiguous chunk of territories as part of Old Silk Road trail disputed to be streets paved with GOLD, pollution and butcher shops featuring carrions, hair and human body organs. Ergo rampant cannibalism. Bat soup eating feast as a precursor of full-blown cannibalism.

Concept: Leadership and managerial skill sets and accompanying dignity and will would come from within upon feasting and cannibalizing offensive new breeds, threats, the outsiders as dubbed by Mandarin Han Chinese who support the Imperial China and whose loyalty to the Emperor embodies wealth, power, prestige, their supreme and pure race, identity.

Irony/Oddity: Korea and Vietnam were part of Imperial China's Tributary System obligating vessel states to obligatory taxations to China for road use there and kowtowing as the protocol by which to greet, address and converse with the Imperial China governing body.

Irony stems from the record/fact that Korea had been dubbed as BARBARIANS along with Western Europeans, the English, Dutch and Japanese and Australians.

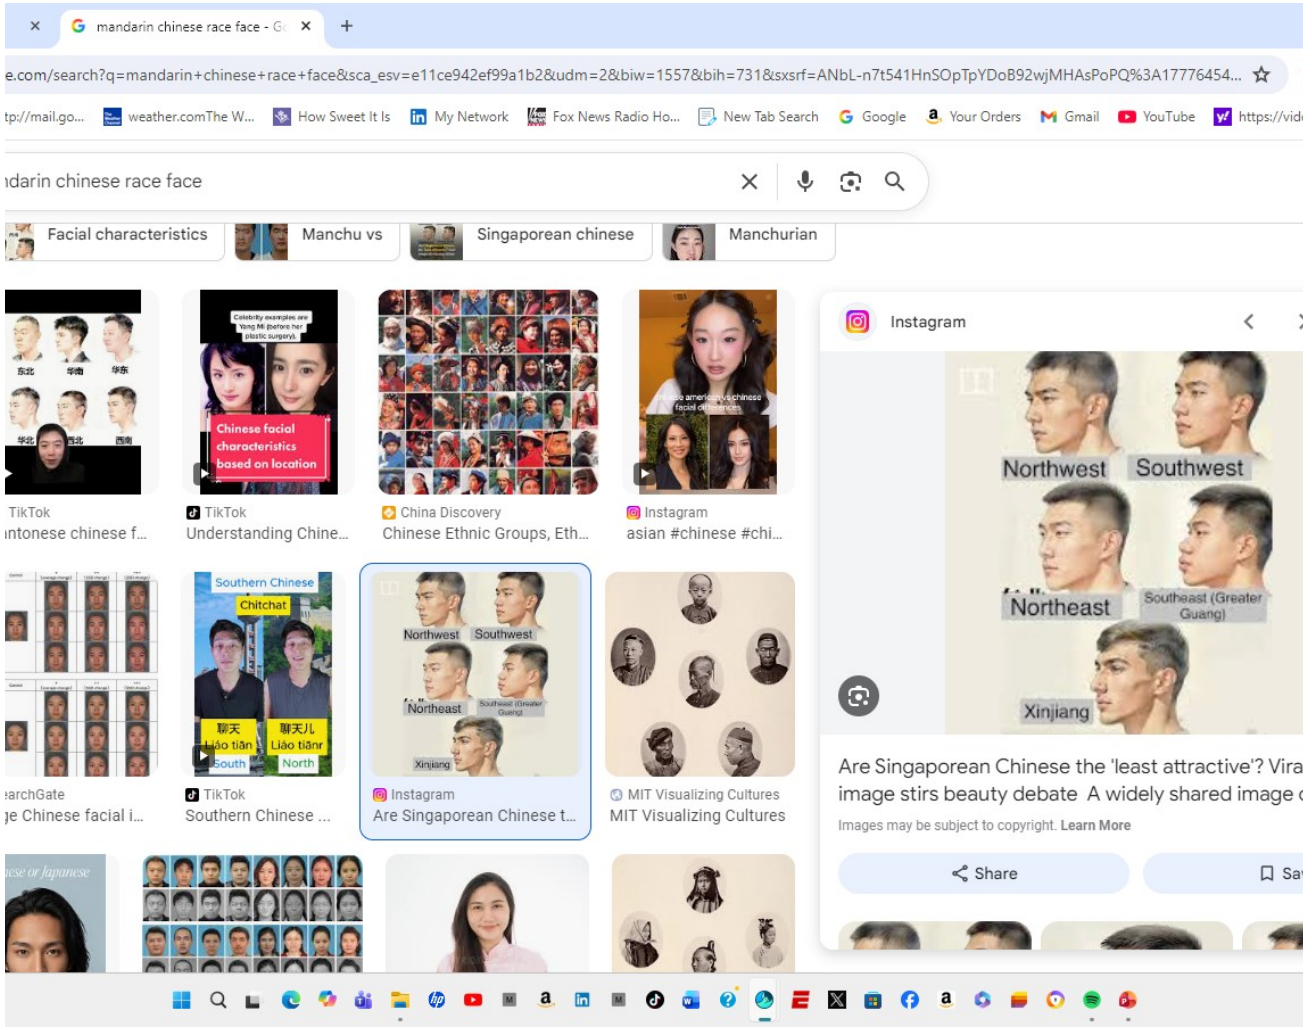
Troublesome Politics/Policies and Practices/Customs

1. Stigma avoidance and pain aversion
2. Comfort and ease as lifestyle and goal to achieve
3. Reciprocity and Parallelism
4. Spoliation, expulsion, obliteration and erasure, ethnic cleansing as a tactic, strategy and methods to deal with aberrations and new unknown factor(s) and new threatening competition in their course of dealings
5. Networking v research & study
6. Collaboration incentives with THE CHINESE: 1) skin whitener 2) instant gratification & quick relief with assurance of tight bond by shared secrets, some of which may be dark & diabolical 3) more faithful to the origin of earth, the brown and dark and bloated earthlings whose evolution has been the culmination of Mandarin Chinese breed, whose hand and palm bends inwardly meaning more friendly towards people of Israel and North Africans nearing Mesopotamia away from classic European studies e.g. Hellenic Greek civilization.



Diversity & Inclusion

Northeast Asia

1) Chinese face looks more attractive in a traditional feminine way because it is more refined and wide set
2) Japanese face is better homogenized by mix of Slavic (Russian) and Mongolian, so they look less pugnacious/aggressive
3) Korean face is narrower around forehead, more close set. Egg shaped is perceived as aesthetically pleasing but rounder face may point to better nutrition and more regular if not frequent dental care, stretching to ENT medical care. Their more pronounced cheek bones and, also Koreans have been historically considered as from being seen as the more authentic and genuine Mongolians as opposed to Chinese or Thai or Malaysian face because of Korean's more "Well Scrubbed" feeling to the countenance from cheekbones.
4) Diversity initiative beyond learning greetings in respective nationality/ancestry, attired in traditional national costume and buffet style international food sampling tasting gatherings and festivals. (concurring: YMCA & YWCA – National)
